Borouge SHAPING the FUTURE with PLASTICS

Polypropylene BJ368MO

Product Data Sheet

Polypropylene BJ368MO

Block Copolymer for Injection Moulding

DESCRIPTION

BJ368MO is a heterophasic copolymer characterized by very high flow, and optimum combination of high stiffness and impact strength.

The material is nucleated with Borstar Nucleation Technology (BNT). Flow properties, nucleation and good stiffness give potential for cycle time reduction.

The material has both good antistatic performance and mould release properties.

APPLICATIONS

Thin wall containers

Food packaging

Small size ice cream containers

SPECIAL FEATURES

Very good stiffness and impact balance

Good flow behavior

Reduced cycle time and increased output
